01 Agriculture

Use this document with its stated edition. Applications and enquiries: contact@greatentity.com. Certificate verification: verify@greatentity.com. Certification follows an assessment and an authorized decision.

Agriculture

Reliable operations across agricultural activities.

Module scope

Named agricultural operating activities and services, with sites, production cycles, customer relationships, and exclusions stated.

Required application across five dimensions

L: define operating responsibilities and seasonal planning. P: examine yield or output, loss, reliability, and delivery measures appropriate to the activity. S: review traceability, maintenance, and supplier interfaces. B: include customers and relevant service partners. I: review response to recurring losses and delivery failures.

Required evidence

Operating and resource plans; production-cycle records; traceability and maintenance logs; quality and delivery records; supplier reviews; customer feedback; improvement evidence. Cover at least 12 months and one complete relevant production cycle. This does not replace food-safety or product certification.

Coverage and decision rule

Apply the common GEEF evidence period, record sampling, beneficiary-feedback protocol, scoring rubric, and mandatory gates. Record the module mapping in the evidence register. Unavailable required evidence must be resolved or the assessment deferred; it must not be silently omitted.

Certification wording

Use "Great Entity for Agriculture" only for a valid certificate that names the assessed entity, activities, locations, and GEEF version. The category name alone must not imply endorsement of activities beyond the certificate scope.
