01 Manufacturing

Use this document with its stated edition. Applications and enquiries: contact@greatentity.com. Certificate verification: verify@greatentity.com. Certification follows an assessment and an authorized decision.

Manufacturing

Organizational performance from planning to delivery.

Module scope

Named manufacturing operations and customer-facing delivery services, with facilities, product families, and exclusions stated.

Required application across five dimensions

L: align production governance and resources. P: measure defects, rework, delivery, downtime, and relevant outcomes. S: sample production controls, maintenance, handovers, and customer issue resolution. B: include customers and relevant downstream users. I: verify corrective action effectiveness.

Required evidence

Production plans and records; quality and rework trends; delivery measures; maintenance logs; sampled nonconformities and corrective actions; customer feedback; supplier controls. This is organizational assessment, not certification of individual products.

Coverage and decision rule

Apply the common GEEF evidence period, record sampling, beneficiary-feedback protocol, scoring rubric, and mandatory gates. Record the module mapping in the evidence register. Unavailable required evidence must be resolved or the assessment deferred; it must not be silently omitted.

Certification wording

Use "Great Entity for Manufacturing" only for a valid certificate that names the assessed entity, activities, locations, and GEEF version. The category name alone must not imply endorsement of activities beyond the certificate scope.
